

Banquet Management Information System

DO YOU KNOW?

Every banquet / event planner needs a strategy for reservation, halls management, delivering information to the kitchen, accurate serving and charging customers for their events. Banquets also need right information for concerned departments and in timely fashion.

Decision making process is fast...!

Manual systems are less prone to technical difficulties, but they cannot process information as efficiently as smoothly functioning computer systems.

Be Updated...!

History

iTech Solutions was created in 2007 to address the need for professional I.T. Services, Software Development services and Web Development. We enable you to become more efficient, streamline your operations, and grow to your true potential with the power of technology.

Products

We are specialized in database management system and customized solutions. We have deployed variety of products in different markets like Restaurants, Banquets, Travel, Schools, Distributions, Housing Schemes and Retail. Our customer base is not only in **Pakistan** but we served **UAE, KSA, Bahrain & International** market.

Services

Unlike other Software and Web Development companies, iTech Solutions strives to partner with your business to implement solutions that you need. We do not try and sell any unnecessary services. If you're successful, we're successful.

Manual vs. Computerized Record Keeping

Manual Record Keeping

- *Highly employee intensive & dependency.*
- *Human errors occurrence.*
- *Longer time to generate reports.*
- *Searching for records is time consuming.*
- *Issues with data security.*
- *Less standardized reporting.*
- *Low productivity.*
- *Paper backup consume space with high cost.*

Computerized Record Keeping

- *Less employee intensive / dependency.*
- *Minimize chances of human errors.*
- *Reports generation on single click.*
- *Searching of records is just few clicks away.*
- *Complete data security with user's management control.*
- *Proper standardized & verified reporting.*
- *Increase productivity & efficiency of employees.*
- *Auto backup with single file to cover years of data.*

iTech Banquet Management System

Menu Defining

- Different menus with dishes name can be defined.
- Any dish can be set inactive temporarily from menu for onward bookings.

Banquet reservation

- This module helps booking different halls for marriages, get-together, birthdays & meetings etc.
- **Booking** under different status is possible like **confirmed, tentative, postponed & canceled** etc.
- Booking is possible under different types (Barat, Walima, Get-Together, Meeting etc.), times (Brunch, Lunch, Hi-tea, Aftari, Dinner etc.) under different Halls.
- Different details feeding for customer like Company, Name, phone, cell, fax, address, city, CNIC, NTN with special remarks, theme, kitchen remarks, guaranteed & expected pax and drivers.
- Option for using **pre-defined, customized or previously used/billed menu with per pax rate, per serving (transport, stage, heater) & per each (mineral water, prawn)** option.
- Function rate, discount, G.S.T, With-holding & kitchen special remarks etc.

Banquets advances / sales / recoveries

- **Banquet advances through accounting voucher** integrated with banquet booking & shows advance amount status at reservation sheet.
- Banquet serial number wise sales with final pax & additional items editing.

- Banquet reservation summary with different status like confirmed, tentative, cancel & postponed etc.
- **Halls management** report showing availability of different halls in different date & time.
- Advances receipt with advance receiving summary report.
- Customer's bill, credit outstanding detail & summarized reports.
- Comprehensive cash handover detail and **daily executive summary.**

iTech Accounts Management System

Accounting Module:

This module will control **all monetary transaction** of your organization. User can define unlimited accounts under **4 level of chart of accounts**. For transactions, different Vouchers are available. **Standardized accounting reports** are already included like vouchers, ledgers, running, parallel & 6 column trial balance etc.

Accounts Defining:

4 level chart of accounts defining

- Accountant will define **customized chart of accounts**. Manual or auto coding of accounts is possible.

A/c defining under C.O.A with details

- Different details of accounts like bank information, cell, phone, fax & address etc. can be enter.

Accounting Vouchers:

Cash payment & receipt voucher

- Separate voucher for cash transaction. Option to **handle multiple cash accounts** in same voucher.

Bank Payment & receipt voucher

- Separate voucher for **multiple bank** transaction with **cheque tracking**.

Journal voucher

- Allows selecting different accounts at the same time for debit & credit entry.

Related Reports:

-  Vouchers, ledgers, **vendor payment voucher**, **accounts activity**, transaction summaries, **trial balance**, **cash flow statement** etc.

AiTech Store Mgt. System

Store management is always a critical task for hotel and banquet industry. This module helps managing stores with different raw items. Issuance and returns helps in managing the cost allocating to kitchens, bar and other general items.

Items Defining

- User can define unlimited items under different chart of items. These Items can be segregated as **raw or finished products**; moreover it can be bifurcated as **kitchen or bar item**. This bifurcation helps printing different K.O.T slips to relevant department as cooking and delivery order.

G.R.N / Purchase / Consumption

- Segregated raw items can be entered in **goods receive note** (G.R.N) for stock keeping. These purchase bills will not only **manage inventory** as well as **directly integrated with accounting transaction** for vendors and updating their respective ledgers.
- Raw items can be store in **different warehouses** like main stores, side stores, cold storages etc.
- This G.R.N has the capability to enter purchase bills of vendors & to **issue / consume** those items at the same time to kitchens in case of fresh items like chicken, meat & milk etc.
- **G.S.T** management is integrated as well as **freight and discount** accounts.

Inventory keeping, issuance & returns

- **Store & kitchen wise issuance** of raw & general items helps indicating cost and quantities a store or kitchen is consuming.
- Store wise detail & summarized cost sheets.

Related Reports

- Items report with codes & sale price.
- Purchase invoices with summary and day to day item activity.
- Current available stock & store wise **summarized & detail cost sheet**.
- Stock issuance gate passes etc.
